

# 1 Disclosure of Methods & Materials

- Provide the client ratings for materials used in project as related to LEED Certification and sustainability when available.
- Use renewable materials such as bamboo hardwood, cork, and recycled carpet.
- Use non-toxic materials during installation of product as applicable.
- Provide Indoor Air Quality CRI Green Label Registrations when available.
- Follow CRI 104 Standard for Installation of Commercial Carpet.
- All trucks run on bio-fuels.
- Use recyclable plastic containers and wraps to move materials to and from jobsites.

# 2 Reclaim and Reuse Removed Carpet

- Extensive "Reclamation Interview" with each installation. FRC must know what happens to the carpet if it is to be removed. We stress re-use over destruction.
- Any unused material from a job is returned to FRC warehouse.
- FRC believes in "Second Life." We wash gently used carpet tiles and donate them for use in needy organizations.

Flooring Resources Corporation is committed to a green industry.

# How do we do it?

# 3 FRC ReCycle Program

- FRC provides free recycling services - with or without project ownership.
- FRC trailers divert 40,000 lbs of carpet from landfills every time they are filled.

# 4 Carpet Maintenance

- Use of Carpet and Rug Institute (CRI) Green Label approved chemicals, methods and equipment for the cleaning and maintenance of carpets.
- Provide training to client's existing facility staff to uphold CRI environmental standards.

# Doing Our Part

- FRC Employees are encouraged to reduce waste.
- Recycling is provided for materials used in daily office work (paper, plastic, toner, etc.)
- FRC's fleet of trucks all run on Bio Diesel.
- FRC offers employees a full service kitchen with dishes and utensils to reduce use of disposable materials. We also provide and encourage use of mugs for beverages rather than disposables.
- FRC is in the process of installing new energy efficient lighting systems in building.

## Flooring Resources Environmental Policy

We recognize the vast amount of waste produced by the carpet industry every year. Flooring Resources Corporation (FRC) wants to reverse that negative stigma by practicing and informing others of our environmentally sustainable policies.

FRC strives to choose sustainable materials and processes whenever possible during installation or removal of commercial carpet. Our library includes sustainable sample information to help designers make better choices in project planning. In addition, we have spearheaded a FRC ReCycle Program in which we pick up and recycle carpet removed from jobsites free of charge. Please review our policy and join us in our efforts to promote a long lasting, healthy environment.

## About Flooring Resources Corporation

Flooring Resources Corporation specializes in the installation of corporate, institutional, retail and healthcare flooring solutions. Being a full service contractor, we represent all of the major manufacturers of carpet and resilient flooring. We pride ourselves in delivering projects on time or ahead of schedule while meeting the full scope of work with no hidden costs.

### Our Services Include:

- Installation of carpet, resilient and specialty flooring
- Take up and removal of old flooring
- Occupied office replacement
- Recycling and reclamation program
- Floor preparation
- Warehousing of overstock or attic stock
- Preventative maintenance programs
- Raised access flooring
- Local delivery with our own fleet of trucks
- Consultative services in product selection

At Flooring Resources, we recognize our customers and their needs as paramount. Our mission is to be the provider for all of your flooring needs. We've Got You Covered!
